Alcatel Mobile 200 Reflexes™

Designed to suit the requirements of employees who are away from their desks most of the time. Thanks to an enhanced autonomy and a lighter weight, the Alcatel Mobile 200 Reflexes™ DECT* handset provides a complete set of features such as integrated vibrating signal, backlit display and keypad, built-in loudspeaker...

Alcatel Mobile 200 Reflexes™ provides, in varying business environments, the ease of use, convenience and ergonomic design associated with cellular telephony.

Offering access to all the added services of Alcatel solutions (such as multiline management, dial-by-name, etc.), the Alcatel Mobile 200 Reflexes™ is a compact and light-weight terminal.

Alcatel Mobile 200 Reflexes™ features a unique user interface with a large screen for easily readable text and graphics, as well as allowing simultaneous display of the most frequently used features and multiple call management. The unique 5-function DriveKey™, covering 95% of navigation needs, facilitates operation and saves time, while the loudspeaker and headset connection provide further functionality.

In addition, the vibrating signal makes sure you are alerted to an incoming call however noisy the surroundings or in situations where a ringing phone is out of place. Special backlighting of the display and keypad enables you to dial in poor lighting.

You will benefit from digital communication including interference-free acoustic quality and coded transmission for secure communication.

* DECT: Digital Enhanced Cordless
 Telecommunications.
